

## IMAGE DATA PROCESSING SYSTEM

### ABSTRACT OF THE DISCLOSURE

An image data processing system comprising;

- an image inputting section for inputting image data;
- an image processing section that performs image processing on the input image data to create image data for printing;
- a first controlling section that performs controls over the image inputting section and the image processing section; and
- an image transmitting section capable of simultaneously transmitting the image data for printing to a print preparing device and to an image storing device, characterized in that the image storing device includes;
- an image receiving section that receives the image data for printing that are transmitted from the image transmitting section;
- a storing medium for storing the received image data; and
- a second controlling section that performs controls over the image receiving section and the storing medium.
